

# How to Embed a Course on a Website

You can easily embed the course on your own website so that learners can take the course without leaving your site.

If you are a premium member with ProProfs then you can completely brand the course with your own logo and remove the "Powered by ProProfs" link. Your audience will not even know that you used ProProfs for [creating the course](#) as it will look completely a part of your website content.

Any changes you make to your course (such as editing questions) appear in the embedded version right away without you having to re-install the embed code.

**Step 1:** On your [ProProfs Training Maker](#) dashboard, click on the **send** icon of the [course](#) you want to embed.

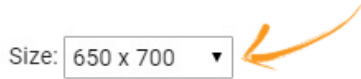

The screenshot shows the ProProfs Training Maker dashboard. At the top left is the ProProfs Training Maker logo, and at the top right is a 'Help' link. Below the logo is a navigation bar with icons for 'Courses', 'Classroom', 'Announcements', and 'Instructors', followed by 'Recent Activity' and a blue '+ Create a Course' button. The main content area is a table of courses. The table has columns for 'Courses', 'Preview', 'Send', 'Reports', and 'Last Modified'. The courses listed are 'Sales Training Template', 'Business Training Template', and 'How to Be a Good Landscape Photographer'. The 'Send' icon (a grey arrow) for the 'How to Be a Good Landscape Photographer' course is highlighted with an orange arrow.

Courses	Preview	Send	Reports	Last Modified
Sales Training Template			0	Nov 08
Business Training Template			0	Nov 08
How to Be a Good Landscape Photographer			0	Nov 07

**Step 2:** Go to the **Embed** tab, select the **size** of your choice, and copy the code given in the box.

Share the course by embedding it on your website or blog [Learn More](#)

You can copy this code into your website's HTML code at a location you desire. And you're good to go!
